

1 September 1960

MEMORANDUM FOR: Chairman, NIS Chapter IX Subcommittee

SUBJECT: Maintenance of Chapters IX

REFERENCE: Your memorandum, same subject, dated 13 August 1960.

1. Reference report and recommendations for improvement of Chapter IX maintenance were reviewed at the 319th meeting of the NIS Committee held on 30 August 1960.

2. The NIS Committee agreed in general with the conclusions, but requested that the Chapter IX Subcommittee re-examine its recommendations with respect to the following:

a. Recommendation 3. b. - It appeared to the NIS Committee that "Section 90. E. Coastal oceanographic charts" more logically belongs in "Section 92. Nautical charts and port-facility plans." Likewise, "Section 90. F. Climatic maps" ought to be grouped in Section 91. "Aeronautical charts and air-transport maps" since they are produced by the Air Force. The Army member suggested regrouping "Section 94. E. Maps and plans of urban areas" under Section 90 since urban area maps are, in effect, a special type of topographic mapping and are mostly produced by the Army.

b. Recommendation 3. g. - The NIS Committee interpreted this recommendation to mean that the preparation of working memoranda and changes to the NIS Standard Instructions will be cleared through the Chapter IX Subcommittee.

Chairman, NIS Committee
